

JORDAN CLEMENS

Software Developer | Full-Stack JavaScript & TypeScript | Cloud & AI Applications

Dudley, NC 28333 | (910) 431-4084 | jordanclemens1986@gmail.com

Portfolio: <https://jordan-clemens-dev.netlify.app> | LinkedIn: [linkedin.com/in/jordanclemens](https://www.linkedin.com/in/jordanclemens)

PROFESSIONAL SUMMARY

Software Developer with 7+ years of experience designing, building, and deploying full-stack web applications for Fortune 500 and mission-driven organizations. Specializes in JavaScript and TypeScript development across React, Node.js, and Next.js, cloud deployment on Amazon Web Services (AWS) and Red Hat OpenShift, and AI-driven features built with large language models (LLMs) and retrieval-augmented generation (RAG). U.S. patent holder for AI-powered enterprise support content generation at Cisco Systems. Consistent record of automating complex workflows, accelerating release cycles, and mentoring engineers on cross-functional teams.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frontend Development: React, SvelteKit, Next.js, Tailwind CSS, Responsive Web Design, UX/UI Design, Web Accessibility

Backend Development: Node.js, Express.js, Nest.js, Fastify, FastAPI, RESTful APIs, Server-Side Rendering

Testing & Quality: Jest, Mocha, Tap.js, Test-Driven Development (TDD), Unit Testing, Integration Testing, Code Review

Cloud & DevOps: Amazon Web Services (AWS), Docker, Red Hat OpenShift, Jenkins, CodeShift, CI/CD Pipelines, Git, GitHub, Netlify, Heroku

Databases: PostgreSQL, MySQL, MongoDB, Redis, TypeORM, Database Performance Tuning

AI & Automation: Large Language Models (LLMs), Generative AI, Retrieval-Augmented Generation (RAG), Prompt Engineering, Workflow Automation

Methodologies: Agile, Scrum, Cross-Functional Collaboration, Technical Documentation, Mentorship

PROFESSIONAL EXPERIENCE

Cisco Systems — San Jose, CA

Software Engineer | August 2022 – Present

- Lead frontend and backend development for the Hardware Installation Guide application, serving 7,000+ Cisco customers and engineers with real-time interactive setup instructions and automated troubleshooting.
- Serve as principal developer and named patent holder for Spanning Content Tree, an AI-powered platform that personalizes and automates enterprise network support content, currently released in beta.
- Integrated large language model (LLM) and retrieval-augmented generation (RAG) capabilities to deliver context-aware automated guidance across 15+ product lines and 50,000+ network assets.
- Built and maintained internal document conversion tools that reduced manual processing time by 96% and saved an estimated 2,500+ engineer-hours annually.
- Designed and deployed CI/CD pipelines using Red Hat OpenShift, Jenkins, and CodeShift, accelerating release cycles by 35% and improving deployment reliability.
- Collaborate with engineering, QA, and product teams to maintain high automated test coverage and deliver features on schedule.
- Mentor junior developers and lead code reviews, raising code quality standards across the team.

AccruePartners — Wilmington, NC (Remote)

Front-End Web Developer | December 2020 – March 2022

- Improved database read and write performance by 40% by implementing Redis caching strategies across multiple client-facing applications.
- Built and executed CI/CD deployment pipelines, coordinating on-schedule product releases for clients in the finance and healthcare sectors.

- Diagnosed and resolved production incidents, increasing platform uptime to 99.9%.
- Partnered with the UX Design Lead to unify the design language and modernize application interfaces.

United States Marine Corps — San Diego, CA

Database and Network Administrator | April 2011 – March 2018

- Administered secure networks and database systems supporting mission-critical military operations.
- Led patching, upgrades, and incident response for IBM AS/400 environments.
- Developed and enforced security, backup, and disaster recovery best practices across multi-OS environments.

PATENT

"AI-Driven Generation and Automation of Targeted Network Support Content" — Cisco Systems, 2024

Patent No. C/P/1042312/US/UTL/1. Enables real-time, automated, context-aware generation of enterprise network support content using generative AI, including actionable guided tasks and configuration automation.

EDUCATION

Bachelor of Science (B.S.), Information Sciences and Technology

Penn State University — University Park, PA | March 2022

Dean's List (6x). Lead Developer on award-winning e-commerce capstone project.

OPEN SOURCE & AWARDS

- Published typeorm-fastify-plugin (TypeScript), an open-source Fastify plugin enabling advanced database connection management for the Node.js community.
- "Best Overall Project," Penn State IST-256 — Coffee E-Commerce Web Application (Lead Developer).
- U.S. patent awarded for AI-driven generation of targeted network support content, Cisco Systems, 2024.
